INFORMATION

We inform you that the corrugated paperboard packaging supplied by Klabin Embalagens, Horizonte - CE factory (CNPJ 89.637.490/0168-15), are manufactured with paper called facings, fluting and finishing materials.

Facings - Kraftliner paper, consisting of virgin fibers, extracted directly from eucalyptus and / or pinus.
Fluting – paper consisting of virgin fibers, extracted directly from eucalyptus and / or pinus.
Glue for the manufacture of corrugated cardboard sheets - Glue manufactured by Klabin Embalagens with corn starch as the main composition
Printing inks - Water-based inks, formulated with pigments that comply with the main local and international standards and legislation (RoHS Directive 2011/65 EU) for use in various packaging and food packaging in indirect contact
Waterproofing for facings - Its chemical composition is an aqueous acrylic coating

According to item 2.14 of RDC 88/2016, the same classifications of foods and food simulants of RDC 51/2010 are adopted, and according to item 2.3.3, table 2, of this RDC, migration tests are not required for fresh fruits and vegetables.

Klabin Embalagens, in consideration of market requests, carries out migration tests for greasy dry foods, which comply with the provisions of Brazilian legislation for cellulosic packaging in contact with food (RDC 88/2016). The production process is in accordance with CE 1935/2004 and 2023/2006.
